Are Vaccinations Right For You?

Dear Young Living friends,

*The purpose of this newsletter is to help each of us in our pursuit of wellness have helpful information available. One of the hottest topics in healthcare today seems to be the issue of the safety of vaccinations and of many medications in the US. *In 1975, when Japan chose as a nation to stop vaccinating children under the age of 2 years, SIDS and infantile convulsions basically dropped to zero in their country. *Studies show that children die at a rate 8 times higher than normal within 3 days of getting a DPT shot. *It is noted that other industrialized nations vaccinate less and have much lower rates of SIDS. However, in the US we have chosen to vaccinate more and not less. Many researchers are starting to compile compelling data that links the rise in vaccinations to Autism and other learning disabilities. In the US where we promote freedom and the home of the brave, it appears that our nation is at a real risk of becoming weaker not stronger as more of our children will need long term care, guidance and counseling. We may no longer be a nation where adult children will care for elder parents. As a health care professional and as a concerned citizen I would ask each of us to make educated choices whenever possible for our families. *The issue and concern on vaccinations does not only cover areas of mercury poisoning but also the detrimental problems with some of the viruses themselves and other toxins/contaminants in the vaccinations. (*For the above information please refer to the book: A Second Look at Vaccines: The Risks and Dangers available through Essential Science Publishing @ www.essentialscience.net or 800-336-6308. This is an easy reading book in large print with documented research articles). "New evidence is emerging that mercury free vaccinations do not exist, only mercury reduced", (comments from Dr. Hill, DC, presenter at Young Living training July, 2004 in Minneapolis, MN.)*

Included are the Top Titles of Articles and Research (of more than 1500) on Vaccine concerns from Dr. Mercola's website! For more info www.mercola.com!

Cleaning Our Bodies from Vaccine and Mercury Toxins

Dave and Star Moree

*The good news in our opinion with **Electrodermal Screening** (an FDA approved testing device that detects imbalances and stress in the body through bio-electrical frequency), we were able to detect toxin residues and mercury in our body from vaccines and other contaminants. We were able to assess that the **Chelex** product would bring our system into balance from these toxins. Another product we have used to aid in the elimination heavy metals is our new oil blend **JuvaCleanse**.*

***JuvaCleanse** has been clinically tested at the Young Life Research clinic to aid the body to excrete mercury from our tissues analyzed through urine analysis (Dr. Hill, DC from the Young Living training in July 2004.) You may find a qualified wellness professional that does **Electrodermal Screening** in your area (check with local chiropractors and naturopathic doctors). If you choose to have vaccinations there may be homeopathic remedies that a qualified professional may recommend to balance your body and immune system.*

*For more information on how to cleanse your body please refer to **The Essential Oils Desk Reference** available through **Essential Science Publishing** at 800-336-6308, or www.essentialscience.net .*

*A great way to experience these oils and products mentioned on this page, is to be on a monthly **autoship**. You can receive an additional **5% discount** off the wholesale price when you have a minimum **monthly autoship of 50 dollars** and you can manage your account on the Young Living website. Check out www.youngliving.com and log into your member area, click on autoship & choose your products and away you go! Receive **25 Autoship rewards points/dollars** to put towards Young Living education by keeping the **same \$100.00 base autoship for 6 months at a time!** See the Young Living website for details!*

Is your Young Living Wholesale Membership about to **EXPIRE???**

If you haven't placed an order in the last 12 months, it may expire! By placing a minimum order you can keep your membership active.

Or you will have to pay a \$20.00 membership fee to renew.

Disinfectant Wipes or Baby Wipes Recipe...

Inspired by Gloria Brinker COTA

Supplies:

- 1 large roll of Bounty Paper Towels
- 2 Cups of water
- 1-2 Tablespoons YL Bath Gel Base
- 10-15 drops of essential oil
- #6 Rubbermaid Container

Directions

First Cut the Bounty Paper Towel roll in half. When you have completed cutting the paper towel roll it will look like two oversized rolls of toilet paper! Save one half for later. Mix water and Bath Gel Base plus 10-15 drops of essential oil in Container. Place paper towel in container. Put cover on and allow the water/ gel mixture to absorb into the towels. You may try turning the Container with sealed lid upside down. Or you may choose to pour the mixture from a 2cup measuring glass over the top of the paper towel roll and let the mixture absorb in. When the mixture has absorbed remove the cardboard center and pull your wipes from the center of the roll!

You may choose to use any of the bath gels or mix the bath gel base with essential oils of choice!

3751 Bath Gel Base

3739 Dragon Time Shower Gel

3742 Evening Peace Shower Gel

3745 Morning Start Shower Gel (good disinfecting gel possibly too strong for baby)

Comments from Star!

I find for our baby I like Lavender with Roman Chamomile (about 12-15 drops total),

Gentle Baby 12-15 drops or **Lavender** 10 drops with 2-3 drops tangerine. For Disinfectant wipes I would try **Purification** or **Thieves** oil blends added to the bath gel base. The Thieves cleaner works well also and you only need 1 capful! Gloria notes that the **Thieves Cleaner** works very well for cleaning wipes for around the house!

Thank you Gloria for the wonderful recipe! I have really enjoyed having these handy wipes for our baby's bottom as well as hand and cleaning wipes!...Star

Fall Schedule of Events...

Wellness begins by educating our mind & applying the knowledge that will nourish our body!

Please pre-register for all classes!

MEGACAL

Did you know that researchers estimate 2 out of 3 American Children are deficient in Calcium and Magnesium? Improving our diet by increasing our consumption of green leafy vegetables (Vitagreen supplements are concentrates of greens plus essential oils) along with decreasing our intake of carbonated beverages may be very helpful to improving our nutritional situation both in children and adults. MegaCal may offer you another supplemental solution to this concern!

MegaCal Code #3280 15.5 oz, WS autoship + web discount price...\$30.88.

A High-Powered Calcium and Magnesium Product with a 1:1 ratio of each mineral. This Product has also been enhanced with zinc, manganese, and copper balanced at scientific ratios to avoid mineral interaction and competition. It also has lemon essential oil added.

This product is mixed in water and has a nice lemon flavor.

MegaCal may enhance more ideal Calcium to Magnesium balance within our tissues.

If you are interested in learning about magnesium and its value please refer to articles for review available on Dr. Mercola's website at: www.mercola.com

The Miracle of Magnesium. 8/7/04

By Carolyn Dean, MD, ND. Magnesium deficiency triggers or causes the following 22 conditions; the introduction ...

www.mercola.com/2004/aug/7/miracle_magnesium.htm

(Please try to read this excellent article. Here is an excerpt from Dr. Carolyn Dean's article "The Miracle of Magnesium")

How to Get Enough Magnesium

How do I get enough magnesium is a question that I'm frequently asked. If there is enough magnesium in the soil where green leafy vegetables, nuts, and seeds are grown then we have a chance to obtain magnesium from our diet. Organic foods may have more magnesium, but only if farmers replenish their soil with magnesium-rich fertilizers. Most fertilizer used on factory farms relies heavily on nitrogen, phosphorous, and potassium to make plants grow and appear healthy.

However, if magnesium and other minerals and micronutrients are not introduced the plants may look good but are not packed with the nutrition we need. Growers should be required to use top-quality fertilizers and should test their crops for the long list of nutrients we need to stay healthy.

In general, to get as much magnesium as possible in the diet, eat plenty of organic leafy green vegetables, nuts and seeds every day. However, if you are suffering from the following symptoms you may need supplemental magnesium:

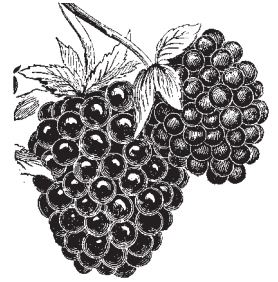

muscle twitches, tics, or spasms	"Charlie horse" (muscle spasm when you stretch your legs)	insomnia or restless sleep	stress	back pain
headaches, migraines	stiff and aching muscles	bones and joints that need continued chiropractic care	weakness	hypoglycemia or diabetes
PMS	nervousness hyperactivity	high blood pressure	osteoporosis	kidney stones
depression or anxiety	heart attack	irregular heartbeat	seizures	confusion muscle weakness

Excerpts from Doug Mills “Down On the Farm”

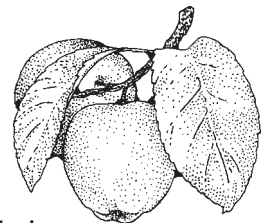

Berry Young Juice Tour ...Reported by Jim Batteiger, Young Living Ambassador

“I attended the first Berry Young Juice (BYJ) Tour event July 27 in Chicago...it was impressive! Please try to get to any of the other 9 events as it comes to a city near you. This is a BYJ super blitz which is being conducted between now and the end of August. Justin Harrison (Young Living Sales/Training Director) was the Master of Ceremonies. He was an entertaining and confident host. The first speaker, Mark Schreuder (Product Formulation Director) gave an amazingly comprehensive research overview on Berry Young Juice. Specifically, he cited (and put up the slides) of hundreds of worldwide research abstracts on the disease fighting and prevention benefits of many of the nutrients contained in BYJ (e.g. vitamins, mineral, phytochemicals, polysaccharides, polyphenols and antioxidants like SOD, etc.). It turns out that vitamins/minerals are only about 10-20% of the real nutritional importance of a food or drink. Much more important are the phytochemicals, polysaccharides, polyphenols and antioxidants. In general, BYJ with its mixture of premium juices has compounds PROVEN to prevent or reverse almost all of the major degenerative, chronic diseases, including aging. All of which helps explain BYJ's #1 antioxidant rating. The second speaker, Dr. David Hill (Researcher at YLEO Clinic) showed live blood analysis before vs. after drinking BYJ. Plus, he used a sick person's blood and a healthy person's blood and in both cases, BYJ improved them dramatically. This was almost unbelievable to actually see the improved blood cell separation and motility after drinking BYJ. (If the blood is separate and moving normally, it can carry more oxygen/nutrients to the cells better.) Even more impressive was the fact that in the cases of NONI, Xango and Himalayan Gogi, not only did the blood not get better as with BYJ, in 2 of the 3 juices, the blood actually got worse (more clumpy and more stagnant). It was explained that this happens because of the added sugars and other solvents and substances that get into those juices as part of the reconstitution process. Maybe the scariest slides were the blood of people who had just consumed sugar or chocolate or coffee. Normal, healthy blood became almost 100% clumpy with almost no motility, which of course causes a huge workload for your immune system, and organs to filter in order to get the blood back to normal. The third speaker was John Terhune (Marketing Consultant) who has an impressive background in network marketing and has been hired by Gary Young to put BYJ on the health juice map. The functional beverage market is over \$5 billion and we don't have our fair share. While we have the undisputed best product, we haven't been very good at marketing it and John will help us! John convinced me that he understands how to integrate good network marketing with a product driven company like YLEO. He already has Phase 1 training available and has a philosophy which is simple, yet proven successful. In general, John has made millions of dollars in network marketing and has some ambitious goals for BYJ. Those who are ready to take the bull by the horns and participate in his new program will have a great opportunity to succeed. Other happenings included a new BYJ Shot Glass for the quick hitters who don't want to mix BYJ in water and a new 7 minute BYJ DVD which was shown and sold for only \$1.00. It's a subset of the 20-minute DVD and is seen as another effective tool, which can affordably be given or loaned to a new prospect along with a juice sample packet. The most important announcement was that the new BYJ website is now expected by the end of August or as early as August 15, 2004.”

APPLES: Food for Thought!

“Want to keep your brain on its toes? Then you may want to keep in mind that old adage about ‘an apple a day’, according to new research from the University of Massachusetts Lowell that suggests that eating apples and drinking apple juice may improve memory and learning. Professor Thomas Shea’s new work indicates that apple juice may protect the brain against oxidative damage that contributes to age-related disorders, such as Alzheimer’s disease, and may help maintain brain performance indicating that eating apples and drinking apple juice may impact our brain health and mental acuity throughout life. Shea’s animal study, ‘Apple Juice Prevents Oxidative Stress Induced by Amyloid-Beta in Culture’, was published in the Journal of Alzheimer’s Disease.” Acres USA, May 2004

Stories and Testimonials from Our Oil Friends

Sonia Freiria, San Juan, Puerto Rico

When I start using the oils, I first look for the ones that oxygenate the brain for my personal use (besides taking raindrop every 1-2 weeks). I start using **Brain Power** (which I put it on my palate, **Gathering, Live with Passion** and **Magnify Your Purpose**. I use them every day. Every day I want to smell the oils until the oils were finished (3 months more or less). Using them regularly makes me feel more each positive and confident in myself and in what I was doing. Then I reorder them and stil using them and also I feel guided to add other oils, like **Believe, Humility, Gratitude**. To really see results in my opinion you should use them consistently and persistently (I mean the ones you choose to work with for shifting issues you want to deal with).

I love all the oils of the **Feelings Kit**. My favorite is **White Angelica** because it was the first one to make an emotional release on me and also for the protection it brings me before I start my work.

I love to use the **Raindrop Therapy** and see the immediate relief it brings to my clients and to myself is amazing.

Iraida Otero, Vega Baja, Puerto Rico

Young Living has all my gratitude and respect. It was at the Young Living Cancun's Seminar in February 2003 that my life made a big change after I could overcome my fears. Now I'm doing what I always wanted to do, helping people and I'm not afraid of doing things wrong. I've been having beautiful expressions with my clients and that gives me the strength to continue. I thank the Heavenly Father for guiding me until I found the oils.

I love all the oils. **Joy** is my favorite because that's the state of being I like to be. I use it every day.

Gladys (Lala) Armstrong, Ponce, Puerto Rico

Oils have changed every aspect of my life, physically, mentally, spiritually. I've never liked to go to doctors but didn't have anything powerful to treat myself, just herbs. Now, whatever the symptom I know oils help me and the rest I ignore until the unwanted visitor for lack of attention goes away! Also my reflexes are incredibly sharp nothing falls down near me. I have much better recollection for names and situations. I could go on forever because I use oils constantly for everything and they always help in more ways than was expected.

Lavender is my favorite. I use it for everything. If I have an itch in my arm, I put on my chest (for protection), on my face with **Geranium, Rosewood and Frankincense**.

Please feel free to submit your stories and testimonials for publication in Microsoft Word format. Be sure to state that you give us permission to publish them to share with our readers. You can email to vitalhealth@warpdive.com.
